

the FiNAL CALL

Lyrics written by: Edwin Fokkema (**FOKK_it**)

The time is now
To come together
Don't overthink how
Just do better
Love is the key
To set ourselves free
It can conquer all
Just start small
This is the first call
The First call

The world is hardening
And people don't care
Warmth is what we're missing
And love to be shared
Spread warmth over this planet
Teach each other to love!
Just learn to embrace it
Because there isn't enough
Of love

Take my hand
And make a change
Together we stand
Don't be afraid

The time is now
To come together
Don't overthink how
Just do better
Love is the key
To set ourselves free
It can conquer all
Just start small
This is the second call

Second call

Second call

It may look hard
To change the world
Just do your part
To make it less cold
Together we can do this
Just start with a smile
You can do without a wish
Be yourself, I know its been a while
Just Smile

Smile

Smile

Oh

Take my hand
And make a change
Together we stand
Don't be afraid

The time is now
To come together
Don't overthink how
Just do better
Love is the key
To set ourselves free
It can conquer all
And start small
This is the final call

Just start small
This is the final call
Final call
