

THE BLACK HOLE

Lyrics written by: Edwin Fokkema (**FOKK__it**)

Hey, FOKK__it
Initiate launch sequence

Systems activated and online
Initiating sequence to Launch
Just give the take-off sign
To go far and beyond
And get ready

Four
Three
Two
One
the Black hole

Gravity is taking control
Our ship up-close
Near our goal
The black hole
Black hole
Hole

Sucked into the black hole
See how it grows
No longer in control
Just let yourself go
Let's go
Go

Everything looks black
In the black hole
No turning back
Are you there,
Mission Control?

Four
Three
Two
One

Black hole

Black hole

Gravity no longer in control
Vanished like a ghost
This was our goal
Cosmic object up-close
Up-close
Up-close

Now stuck in a black hole
Mystery revealed
No longer in control
Initiate heat shield
Initiate Shield
Shield

Everything got black
This our final call
Is there way back?
Can you hear me,
Mission Control?

Four
Three
Two
One

Black hole

Hi FOKK__it are you still there?
Everything is so quiet
Do you have something to share?
I lost my sight
Hope you are fine?
Please take care
And return this flight
To get in control
Of this Black Hole

Black hole

Black hole
